

Vivre à l'étranger

Living in a country, which is not your home country is always enriching. However, if your expatriation is not well prepared and if you do not have the keys to settle in your new country, this expatriation can become a nightmare.

We, at **Studio Expat & Lang** (<http://www.studio-expat-lang.net>), are focusing on Expatriates and Expat Life. As an expatriate ourselves, we know best how to help them and make the lives of the expatriates happy and joyful.

Studio Expat & Lang offers **workshops** and language **classes** to expatriates and their families (the spouse and children who are following) whether they already settle in their new country; or are planning to leave. We concentrate on the various stages of expatriate life; we help them to be able to find their way in their new country and help them feel more at home in the country which is going to be their home for a few years.

Feel free to contact us to book a workshop face-to-face or via Skype for yourself and/or your colleagues who are expatriation

We'll be happy to send you a quotation and work with you
